CODE PAYERS

# Greatest Asset

## People & Community & Peers

Employees (as of 2024)

**34,215** ppl

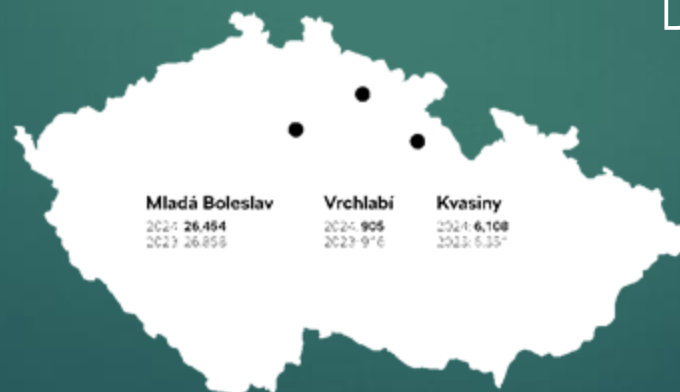

DATA & AI Masters

**200** experts

Workforce

**3** city clusters

Digitalization positions

**140** by 2028

# Do we **MAXIMIZE** the asset?

... it is **difficult** because...

1. Fragmented info from various platform

- So many different systems (e.g., ERP, external platforms) are not consistent
- No unified skill library

2. Too many people to find right mentors with suitable goals

- high career mobility bring too many possibilities
- 34k+ employees imply a great variety of skill sets

# How we **MAKE** a difference?

... it is **simpler** because...

## 1. Unified skill library to complete skill mapping for courses & qualifications

- Get a model from “degree\_content\_catalogue” (NPL)
- Each employee is identified with comprehensive skills (#7, #16)
- Create **5 major indicators** to demon their skill-learning profile

## 2. A skill clustering map to filter /recommend mentors (qualifs, courses)

- skill-clustering map that positions all employees (K-means)
- Clearly shows the **skill gap** between any two ppl
- Filter by user or recommendations by AI power (embedded API)

- Comprehensive skill clustering

## Employee Skill Clustering

Visualize employee skill similarities using UMAP and K-Means clustering

Filter by Cluster: All Clusters

Total Employees: 196

Clusters: 10

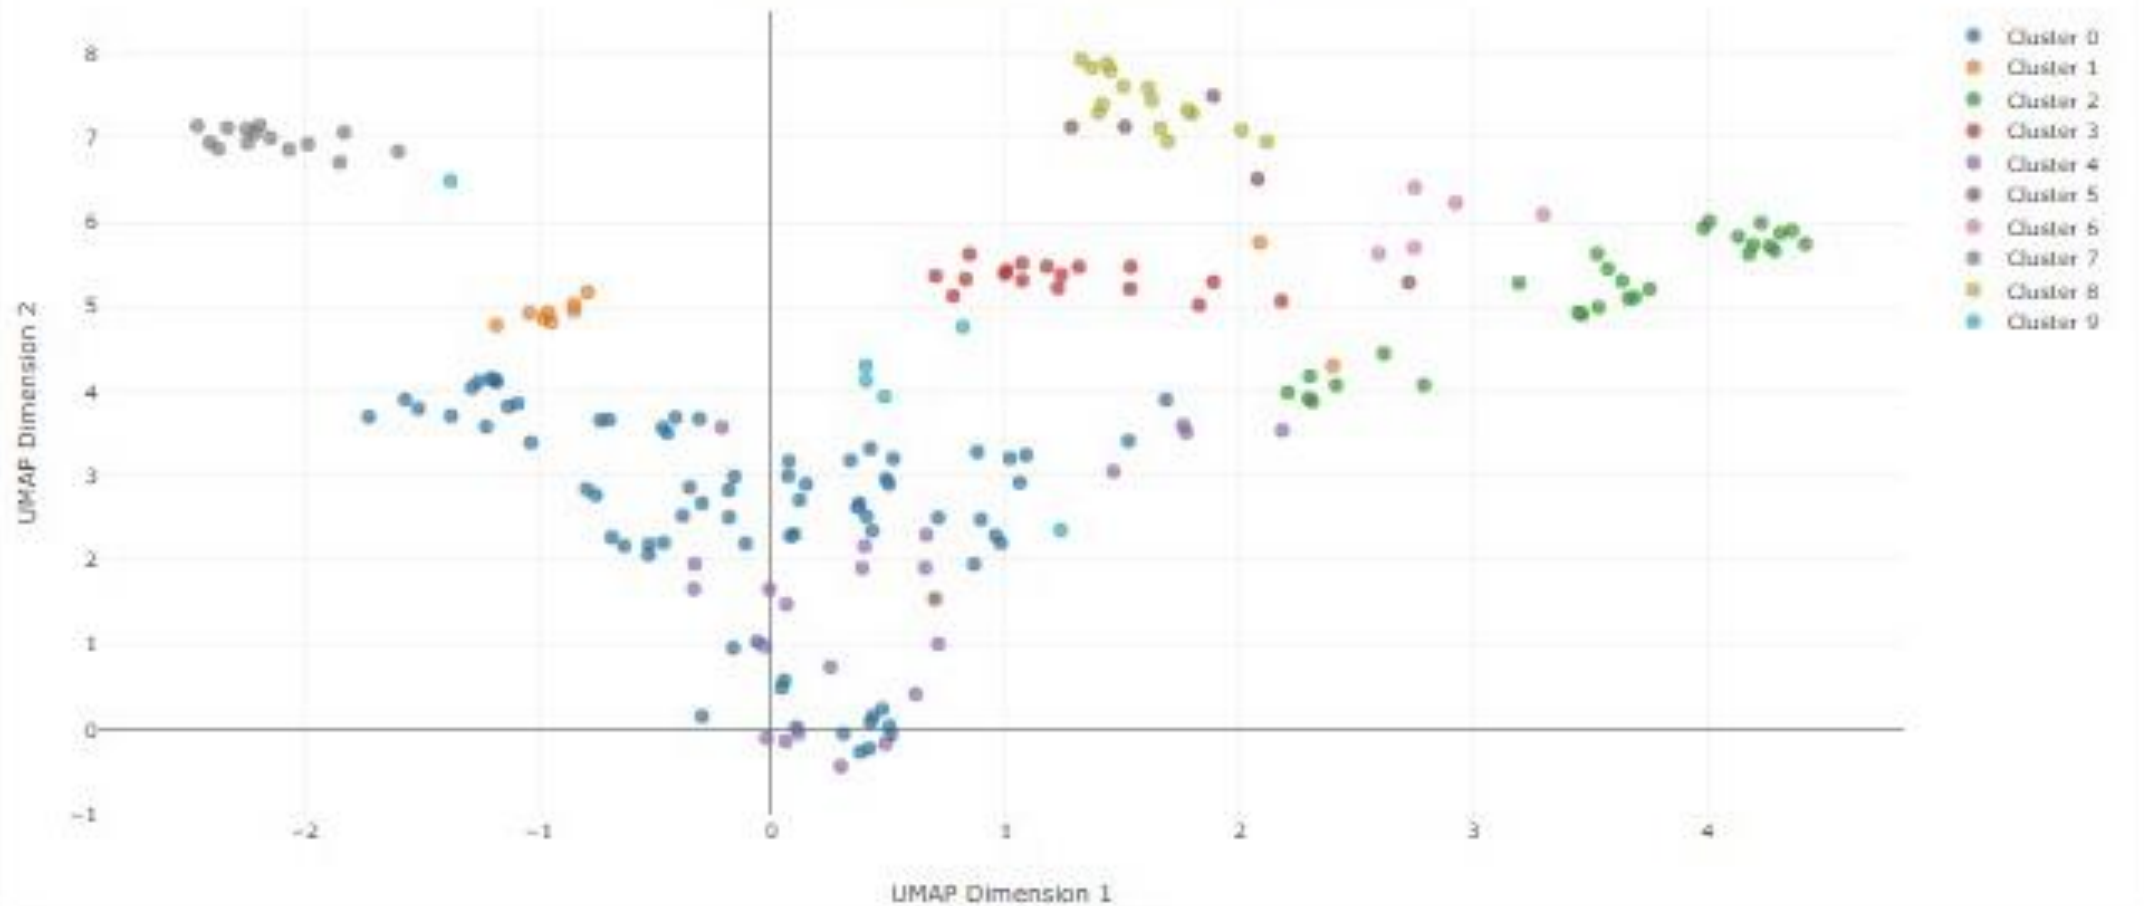

### About This Visualization

This visualization uses UMAP (Uniform Manifold Approximation and Projection) to reduce the dimensionality of employee skill vectors and K-Means clustering to group similar employees. Each point represents an employee, and colors indicate different skill clusters.

- UMAP Dimension 1 & 2:** Reduced dimensional representation of skill vectors
- Clusters:** Groups of employees with similar skill profiles
- Hover:** Employee ID and top TF-IDF skills
- Filter:** Use the dropdown to focus on a cluster
- Data Source:** Served from backend clustering API (generated via data scripts parity)

- All employees and skill clusters

- Mentor search filter

## Find Mentors

Search for suitable mentors based on various criteria

### Search Filters

 Search Mentors

 Reset

#### Basic Information

Mentee ID \*

Enter employee ID

Target Position ID

Optional: position ID for qualification matching

Max Results

20

#### Organization & Cluster Filters

☐ Same Organization Only

☐ Same Skill Cluster Only

Cluster Radius (UMAP distance)

Optional: max distance in skill space

#### Skill & Qualification Filters

Min Skill Depth

0-10

Min Job Coverage

0-10

Max Skill Gap

0-10

Min Recent Learning

0-10

Min Qualification Match Fraction

0

Skill Keywords (comma-separated)

e.g., python, ai, cloud

Enter a mentee ID and click "Search Mentors" to find suitable mentors.

AI1 - 1. Kvíz	—	ai
AI1 - 1. Kvíz	—	ai
AI1 - 2. Kvíz	—	ai
AI1 - 2. Kvíz	—	ai

#### ESG

- Upskill **AI Recommendations**

# What are the **IMPACTS?**

... it gives clear ideas about...

## 1. Employee skill-awareness

- Understand better:  
current skill set,  
learning style,  
skill gap with peers
- Help to set up:  
Learning goals,  
Career goals,  
motivations

## 2. Peer-based learning community

- Mentors that are filtered out:  
seniors, peers or experts from  
other skill set
- Customized mentorship program:  
Cooperative, flexible, structured  
by guidance of AI, achievable  
goals

## 3. Maximize Human Resources

- 200+ Data & AI experts
- Interpersonal instructions
- Community co-building
